Pacecourt Cushion Coat is a resilient, multi-layered application designed to provide the player with added comfort and a more enjoyable playing experience by reducing shock to the lower extremities. The system should be applied only to properly prepared concrete

MIXING RATIO

CUSHION - 50 KG
WATER - 40 LITRE

BUCKET SIZE
25 KG

COVERAGE
0.26 KG/M²

Colorcoat Chart for Tennis Court and Recreational Surfaces

Colors are as accurate as possible. Slight variations may occur due to job site conditions, mixing proportions, and installation methods. Premium Colors require additional lead time. Custom Colors available upon request.

COLOUR COAT

Pacecourt Colour Coat is a wear resistant, 100% acrylic emulsion consisting of brilliant pigments and quality polymers that are blended into a highly concentrated form. Pacecourt colour coat does NOT contain any asbestos, lead, or mercury. An excellent advantage of the Pacecourt color coat product is that it can be used for both the texture and finish coats, by job-mixing with water and/or silica sand to achieve the desired surface texture and speed of play.

MIXING RATIO

- COLOUR - 25 KG
- WATER - 16 LITRE
- SILICA SAND - 10 KG

**PACECOURT'S
TENNIS NET POSTS**

Tennis posts play a crucial role in the game of tennis. They are the vertical structures that support the net, a key component that divides the court into two equal halves. Typically made from sturdy materials like metal or wood, these posts ensure the net remains taut and at the correct height, which is vital for fair play. Positioned at each side of the court, they often have mechanisms for adjusting the net's tension, allowing for precise setup.

**PACECOURT'S
BADMINTON &
TENNIS NET**

The tennis net, an integral part of any tennis court, serves to divide the playing area into two equal halves. Made from a durable nylon mesh or similar materials, it is suspended by a cord or cable, ensuring it remains at the precise regulation height.

**PACECOURT'S
WATER PUSHER**

A water pusher is a practical and efficient tool commonly used in the maintenance of outdoor sports courts. Designed to effectively move or push water from one area to another, it is especially handy for clearing water puddles or excess moisture from surfaces like tennis courts, basketball courts, or other playing fields.
