

Acrylic Flooring System Guide

Complete Guide to Pacecourt Synthetic Acrylic Sports Flooring

Pacecourt acrylic flooring systems are designed for tennis courts, pickleball courts, basketball courts, badminton courts, volleyball courts, walking tracks and multi-purpose courts. These systems combine durability, UV resistance, slip resistance and consistent playing performance. The multi-layer construction ensures long-term value while maintaining professional sports characteristics in demanding outdoor and indoor environments.

What is an Acrylic Flooring System?

An acrylic flooring system is a multi-layer sports coating applied over a properly prepared concrete or asphalt base. Each layer has a specific purpose—from improving adhesion to creating texture, cushioning and vibrant color. The result is a high-performance surface suitable for competitive and recreational play.

Layer	Purpose
Primer	Improves bonding with base
Resurfacer	Creates a smooth, durable foundation
Cushion Coat	Enhances comfort and shock absorption
Color Coat	Provides texture, grip and appearance
Line Marking	Defines court boundaries

Key Benefits

- UV resistant and weather resistant
- Low maintenance
- Consistent ball bounce
- Slip-resistant texture
- Multiple color options
- Long service life
- Suitable for schools, clubs, academies, parks and residential projects

Installation, Specifications & Maintenance

Installation Process: Site inspection, surface preparation, crack treatment, resurfacer application, cushion layers, color coats, line marking and final inspection. Proper drainage and base preparation are essential for long-term performance and warranty compliance.

Applications

Pacecourt acrylic flooring systems are widely used for tennis courts, pickleball courts, basketball courts, badminton courts, volleyball courts, walking tracks and multi-purpose sports facilities. They are ideal for

Maintenance Guidelines

regularly, rinse with clean water, remove standing water promptly, inspect drainage systems and schedule annual inspections. Avoid acid-based cleaners, metal tools and prolonged water accumulation.
